Notre solution

Proprietary ESG platform

Developed in-house, the platform is supported by a dedicated analyst team delivering rigorous **ESG data collection** and **scoring** for European companies.

Consistent, high-quality data

All data are **extracted directly from annual reports**, ensuring **reliability** and enabling **consistent and comparable analysis** across companies.

Intuitive data visualisation

Clear data visualisation enabling easy comparison of **companies' ESG performance**, identification of **sector leaders**, and **tracking of criteria** over time.

Platform features

1

In-depth ESG dashboard

2

Multi-criteria search and screening engine

3

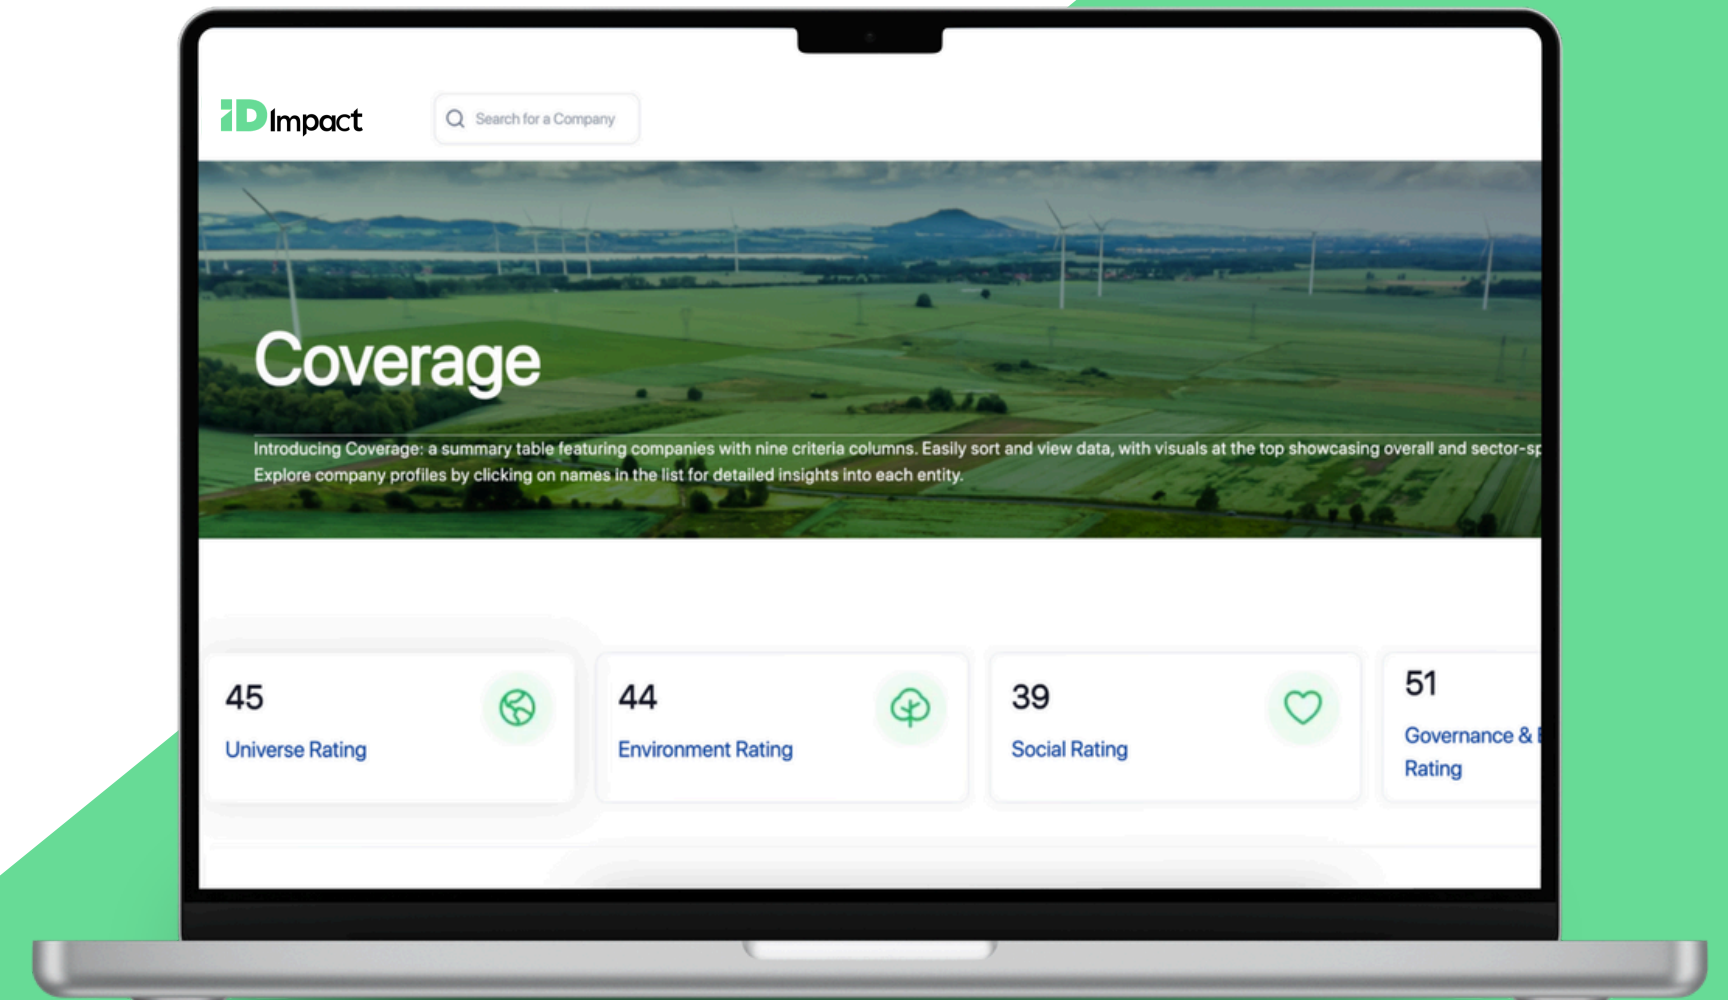

Data extraction and report generation

4

Universe-wide benchmarked scoring

5

Sector-based ranking tools

Our methodology

A rigorous approach based on **230 data points**, of which 189 directly contribute to the scoring

Environmental

64 Environmental criteria

- Greenhouse gas emissions
- Energy consumption
- Waste management
- Biodiversity

Financial

19 Financial criteria

- Financial Indicators
- Economic performance
- Banking ratios

Social

74 Social criteria

- Diversity and inclusion
- Health and safety
- Employee training
- Social impacts

Governance

73 Governance criteria

- Board structure
- Business ethics
- Transparency
- Remuneration

We use **two reference business models** to deliver more relevant scoring, together with comparison tools against the global corporate universe.

500*
Companies covered

Geographical Coverage

Our platform covers a wide universe of European companies, offering a comprehensive overview of the European ESG landscape.

France

190 French companies

Covering the CAC 40, Next 20, CAC Mid 60 and CAC Small indices

Benelux

110 Benelux Companies

Covering the BEL 20, AEX, BEL Mid, AMX, BEL Small and AScX indices

Italy

135 Italian companies

Covering the STAR, FTSE MIB, FTSE Mid and FTSE Small indices

Iberian region

75 Iberian companies

Covering the IBEX35, IBEX Mid, IBEX Small and PSI Small indices

Our geographic coverage enables investors to compare ESG performance across European markets and identify best practices by region.

Outlook 2026

Q2 2026

Update of data for the 500 companies to incorporate 2025 data from the latest published annual reports.

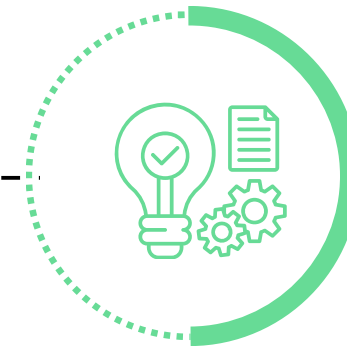

Q4 2026

Expansion of coverage to Nordics Companies

Q1 2026

Development of advanced sector-level analysis and customised benchmarking tools.

Q3 2026

Expansion of coverage to Germany

We also plan to integrate the new requirements of the Corporate Sustainability Reporting Directive (CSRD) and align with the European taxonomy to ensure our platform remains at the forefront of ESG regulation.

Our roadmap aims to continuously enhance the platform to meet investors' growing needs for ESG analysis.
